

### **Overview**

The new generation Eco Line of medium and heavy-duty machines combines innovative engineering with a maximum of user convenience, economy and a long service life, even under very demanding operating conditions.

Order no. 1.025-316.0

# **Description**

This medium-duty hot water high-pressure cleaner offers a high level of operator comfort and service-friendliness.

The tanks for heating oil, detergent and scale inhibitor can be filled from outside without having to open the machine cover. The machine cover is lockable. A compartment is provided for storing nozzles, tools and other small parts so that they are always at hand.

The upright boiler with integral high-performance burner ensures excellent heat exchange which is one of the prerequisites for complying with emission regulations. The boiler's special design avoids dew point corrosion.

The outstanding features of the smooth-running three-piston axial pump with its chemical resistant brass cylinder head are its simple construction, compactness, low operating sound and long service life.

The high-pressure pump, burner fan and heating oil pump are driven directly by the electric motor. This layout reduces overall size and guarantees high efficiency and reliability.

### **Application**

For medium-sized shops in the car business For car washes For chassis washing For engine washing For the pre-wash in car washes General cleaning tasks in the industry, municipalities and agriculture

# **Features & Benefits**

4-pole eletric motor

Water cooled 4-pole eletric motor - 1400 rpm delivers pre-heated water, high pressure pump - fuel pump and blower driven by single shaft. Result - high efficiency and long lasting time

Chimney - outlet cover Made of stainless-steel integrated in the unit cover

Easy Press trigger gun

Ergonomical designed trigger gun with soft grip inlay and reduced holding and trigger force for fatigue free working in long terms

Exhaust gas temperature sensor

The exhaust gas temperature sensor which is integrated in the chimnes switches off the electirc motor when the exhaust gas temperature exceeds 300°C. Additional working safety for the user in case of burner malfunctions.

# ► ...

Fine-mesh water filter

With transparency housing, integrated on float-tank, Safe protection of the high-pressure components against dirt and particles in the feed water for higher service life time

Hose reel

The high-pressure hose can be conveniently unwound and rewound on the hose reel to provide plenty of reach.

Low fuel cut-out The unit shuts down automatically when the tank is empty. No risk of residual oil igniting unintentionally

Servo Control

Sensitive user friendly pressure-/ water flow adjustment through the servopress control direct on the trigger gun

Soft damping system (SDS)

A special high pressure hose (recognisable by the yellow colour and the SDS-labelling) between the safety device and the high-pressure pump eliminates / compensates the arising vibrations in the high-pressure system by factor 2,5

Three-piston axial pump with ceramic pistons Guarantees long service life
