

Scrubber driers ride-on

BR 75/140 R Bp Pack

Overview

Ride-on scrubber drier with roller brushes and a working width of 75 cm, high battery capacity, large water tank. Positioned between BR Trike and BR 1000.

Order no. 1.246-171.0

Standard accessories

Roller brush
 , Traction drive, Battery and charger on board
 , Automatic water stop
 , Battery type
 Low maintenance, Battery and charger on board, Parking brake, Integrated sweeping attachment, Solenoid valve, 2-tank system

Technical data

Working width, brush mm	750
Working width, vacuum mm	940
Tank capacity fresh water l	140
Tank capacity dirt water l	140
Max. area performance m ² /h	4500
Brush rotation speed rpm	500-1100
Brush contact pressure g/cm ²	290
Battery Voltage V	24

Scrubber driers ride-on

BR 75/140 R Bp Pack

Description

This ride-on scrubber drier is used in areas that are normally reserved for big walk-behind models. It is ideal for large supermarkets, warehouses and factory floors. Thanks to its compact suction width, this machine has no problem travelling through narrow doorways and aisles. Optimal adjustment on different floor coverings by continuous adjustable brush pressure and water quantity. A further advantage are FACT: the optimal adjustment of brush speed on the application and the necessity of the surrounding. The memory function allows the operator to recall his personal saved adjustments e.g. brush pressure and water quantity at the push of a button.

The chassis has been designed to make this machine one of the most manoeuvrable in its class. It needs only 1.6 metres between walls to turn and can be driven away from walls and shelves at a right angle without damaging them.

Pre-sweeping facility sweeps coarse dirt into the bin.

Water guide rail feeds dirty cleaning solution to suction beam for optimum pick-up. This ensures dry floors even in tight corners.

The battery is positioned in the centre of the housing and rated for up to 2,5 hours of operation.

140-litre fresh/dirty water tank for long periods of uninterrupted operation (up to 2250 m² with one tank filling)

Application

Attractive for the following target groups: Contract cleaners, shopping centers, warehouses and industry, economical on areas of 2000 to 4500 sq.m

Features & Benefits

Automatic water and brush stop when the machine is stopped.

Protection of sensitive surfaces because the pump and the brushes are automatically controlled.

Large brush head with contra-rotating brushes and an integrated sweeping device.

Best sweeping result because the dirt in front of the machine is swept-in as well as the dirt in the rear. Suction beam doesn't get blocked due to cigarettes etc. Low fresh consumption because the cleaning solution goes along with second brush.

Large fresh/waste water tank (140/140 l).

No continual refilling anymore which provides long and cost-saving operation intervals. With integrated fresh water filter.

Longlife turbine.

Scrubber driers ride-on

BR 75/140 R Bp Pack

36 month warranty. No carbon brushes because they are quickly worn out. Long life-time and best suction performance.

Memo-function.

Increased economy because for repeated operation tasks always the same water and detergent-amounts are used (no overdosing!). Lower risks of damages because the brush pressure is also pre-adjusted.

Powerful battery (240 Ah(C5)).

The batteries have no problems with working up to 2,5 hours without interruption.

Tank is shaped like a „V“.

Long operation intervals without foam-formation because foam is spread out over a large area and dissolved when the waste water level increases.

Two-piece, hood made from plastic (PE).

Robust and impact resistant, noise-reducing and corrosion-free. Clear driver's position as well as an outstanding traction because the batteries are positioned centrally.

Very clear operation panel. All functions are clearly readable.

Brush pressure and water amount are electronically adjustable. Using the machine is easily learnt. No long application trainings are needed.

Water guide strip at the brush head.
