Description

The outstanding feature of the new one-motor Ap series is its compactness. Both vacuum cleaners are high-performance, compact vacuum cleaners for professionals. The 35/1 Ap offers a larger container with 35 liters. Both models come standard with flat pleated filter and semi-automatic filter cleaning, which allows to work longer without interruption.

Features & Benefits

Two features mark the Ap class wet/dry vacuum cleaners:

The flat pleated filter is located within the turbine head. Therefore, it enables the complete usage of the container capacity and can easily be changed from the clean side.

With the semi-automatic filter cleaning system ApClean the filter is cleaned at the push of a button. This enables working longer without any interruption.

- * The semiautomatic filter cleaning system ApClean provides an unclogged flat pleated filter. That way you can work longer without interruptions.
 - * The flat pleated filter offers an optimal use of the container capacity and can be changed easily from the clean side.
 - * With its complete accessory kit the NT 35/1 Ap can be used immediately.
 - * Even with the compact design the NT 35/1 Ap has cable and hose hooks
 - * On its sturdy rollers the NT 35/1 Ap follows its user almost anywhere.
