

Wet and dry vacuum cleaners

NT 361 Eco

Overview

Small handy commercial wet/ dry vacuum cleaner with patented filter back flushing (PFC - Power Filter Clean) and complete equipped with accessory.

A further variant is the TE- version with a power outlet/ socket with automatic on-off control for electric power tools.

Order no. 1.184-101.0

Standard accessories

Suction hose
2.5 m
, Metal suction tube, 2 x 0.5 m
, Filter bag
Paper, Wet and dry floor tool
300 mm
, Crevice tool
, Auto shutdown when max. level is reached,
Eco filter system
, Flat pleated filter
Paper, Power Filter Clean
, Safety class
II, Caster with brake

Technical data

Air flow rate l/s	57
Vacuum mbar /kPa	235/23.5
Container capacity l	35
Max. intake performance W	Max. 1380
Standard nominal width mm	35
Length of cord access. m	7.5
Sound pressure level dB(A)	63
Container material	Plastic
Frequency Hz	50-60

Wet and dry vacuum cleaners

NT 361 Eco

Description

The small NT 361 eco wet and dry vacuum is a particularly user-friendly unit which is ideal for universal applications, e.g. in the trades, contract cleaning, finishings, car dealers and private household.

One very practical feature of the new vac is the flat pleated filter which offers some essential benefits:

The user can alternate between wet and dry pickup without any interruption because the filter element is always above the fluid level.

Access to the filter is quick and simple because it is not necessary to remove the motor head first.

Flat pleated filter increases useful capacity of container since it does not project downwards. Power Filter Clean System, filter cleaning via remote control ensures constant suction power.

The electronic level monitor automatically switches the fan motor off when the maximum liquid level is reached.

Unit has two large diameter wheels at the rear and two castors at the front for high stability and manoeuvrability, it is also light enough to be carried without difficulty. A large On-/Off-switch as well as holders for storing the cable and accessories on the unit offer additional user convenience.

Application

Universal applications in all the crafts and trades, e.g. wood-, plastic- and metal working trade & commerce, joiner's workshop, carpentry, automotive & car preparation, contract cleaners, service and private household.

Features & Benefits

Bypass suction fan installed in sound-proofing hood (63 dB (A)) • High suction power, trouble-free wet and dry pickup, low operating noise.

Easily removed fan motor head with integrated on-/ off-switch, power cable holder and accessory storage •

Waste container easily accessible, optimum protection for paper filter bag, convenient handling and operation

ECO flat pleated filter tested according to the dust class M •

Large filter area (0.62 m²) with the six benefits of the ECO-flat pleated filter

Wet and dry vacuum cleaners

NT 361 Eco

Electronic liquid level monitoring during wet pickup•
Fan switches off automatically when maximum liquid level is reached.

PFC (patent) Power Filter Clean• Minimum filter wear, filter cleaning is done by remote control and ensures continuous high suction power
